Press Release

Response to the Site Incident of Hung Shui Kiu Phase II Dedicated Rehousing Estate Project

Paul Y. is at this time focused on the fire incident that occurred at our construction site for Hung Shui Kiu Phase 2 Dedicated Rehousing Estate project. The construction site is still in the hands of the Fire Services and we are closely monitoring the situation.

As a responsible major contractor, Paul Y. prioritises safety in the workplace and the health and safety of everyone working on its projects. In order to safeguard our employees, workers and the general public, we implement safety measures and policies, including provision of firefighting facilities and fire prevention policies, in full compliance with relevant legal requirements and our contractual obligations to our clients. Upon becoming aware of the incident yesterday, we swiftly evacuated everyone from the construction site to a safe place in an orderly manner. And upon arrival of the Fire Services, we conducted additional attendance checks to ensure everyone was accounted for and no one was left at the incident area. Fortunately there were no known injuries to persons arising from the incident.

We will continue to monitor the situation closely and cooperate with various government departments and authorities in their investigation of the incident.
